

FULL SYLLABUS TEST [FST-03]

(ALL INDIA FULL SYLLABUS TEST SERIES-UG)-2022

(Do not open this Test Booklet until you are asked to do so.)

Please read the instructions carefully :

- The Test pattern of NEET (UG)-2021 comprises of two Sections.
Each subject will consist of two sections. Section A will consist of 35 Questions and Section B will have 15 questions, out of these 15 Questions, candidates can choose to attempt any 10 Questions.
The pattern for the NEET (UG)-2021 Examination for admission in the Session 2021-22 is as follows:

Sr. No.	Subject(s)	Section(s)	No. Of Question(s)	Mark(s)* <i>*(Each Question Carries 04 (Four) Marks)</i>	Type Of Question(s)	
1.	PHYSICS	SECTION A	35	140	MCQ (Multiple Choice Questions).	
		SECTION B	15	40		
2.	CHEMISTRY	SECTION A	35	140		
		SECTION B	15	40		
3.	BOTANY	SECTION A	35	140		
		SECTION B	15	40		
4.	ZOOLOGY	SECTION A	35	140		
		SECTION B	15	40		
TOTAL MARKS				720		

Note: Correct option marked will be given (4) marks and Incorrect option marked will be minus one (-1) mark. Unattempted/Unanswered Questions will be given no marks.

- The important points to note:
 - Each question carries 04 (four) marks and, for each correct answer candidate will get 04 (four) marks.
 - For each incorrect answer, 01(one) mark will be deducted from the total score.
 - To answer a question, the candidate has to find, for each question, the correct answer/ best option.
 - However, after the process of the challenge of key, if more than one option is found to be correct then all/any one of the multiple correct/best options marked will be given four marks (+4).
- Any incorrect option marked will be given minus one mark (-1).
- Unanswered/Unattempted questions will be given no marks. In case, a question is dropped/ ignored, all candidates will be given four marks (+4) irrespective of the fact whether the question has been attempted or not attempted by the candidate.

Your Target is to secure Good Rank in Pre-Medical 2022

INSTRUCTION

- The candidates should ensure that the Answer Sheet is not folded. Do not make any stray marks on the Answer Sheet. Do not write your roll no. anywhere else except in the specified space in the Test Booklet/Answer Sheet.
 - Before attempting the question paper ensure that it contains all the pages and no question is missing.
 - Each candidate must show on demand his/her Admission Card to the Invigilator.
 - If any student is found to have occupied the seat of another student, both the students shall be removed from the examination and shall have to accept any other penalty imposed upon them.
 - No candidate, without special permission of the Superintendent or Invigilator, would leave his/her seat.
 - The candidates should not leave the Examination Hall without handing over their Answer Sheet to the Invigilator on duty and sign the Attendance Sheet twice. Cases where a candidate has not signed the Attendance Sheet second time will be deemed not to have handed over Answer Sheet and dealt with as an unfair means case.
 - Use of Electronic/Manual Calculator is prohibited.
 - The candidates are governed by all Rules and Regulations of the Board with regard to their conduct in the Examination Hall. All cases of unfair means will be dealt with as per Rules and Regulations of the Board.
 - The candidates will write the Correct Test ID Code as given in the Test Booklet/Answer Sheet in the Attendance Sheet.
-
-

BEWARE OF NEGATIVE MARKING

TOPIC : Full Syllabus (XI-MODEL)

SECTION-A

- If the position of the particle is given in the function of time as $x = 4 + t^2 - 4t$. Then find out distance covered by in 4 sec.
 - 9 m
 - zero
 - 8 m
 - 36 m
- At $t = 0$ a particle is projected from point O on the ground with the speed 50 m/s at an angle 53° with the horizontal it just passes two points A and B each at height 75 m above the horizontal at time t_1 and t_2 , then $t_1 + t_2$ equal to :
 - 8 sec
 - 4 sec
 - 10 sec
 - 6 sec
- In the given figure find out average velocity between the points P and Q :

 - $u \sin \theta$
 - $u \cos \theta$
 - $\frac{u^2 \sin 2\theta}{2g}$
 - $\frac{u^2 \sin \theta}{\sin \theta}$
- The effect of noise on the speed of sound in air :
 - $v \propto \frac{1}{\text{intensity of noise}}$
 - $v \propto \text{intensity of noise}$
 - independent of noise
 - $v \propto \left(\frac{1}{\text{intensity of noise}} \right)^2$

SECTION-A

- If the position of the particle is given in the function of time as $x = 4 + t^2 - 4t$. Then find out distance covered by in 4 sec.
 - 9 m
 - zero
 - 8 m
 - 36 m
- At $t = 0$ a particle is projected from point O on the ground with the speed 50 m/s at an angle 53° with the horizontal it just passes two points A and B each at height 75 m above the horizontal at time t_1 and t_2 , then $t_1 + t_2$ equal to :
 - 8 sec
 - 4 sec
 - 10 sec
 - 6 sec
- In the given figure find out average velocity between the points P and Q :

 - $u \sin \theta$
 - $u \cos \theta$
 - $\frac{u^2 \sin 2\theta}{2g}$
 - $\frac{u^2 \sin \theta}{\sin \theta}$
- The effect of noise on the speed of sound in air :
 - $v \propto \frac{1}{\text{intensity of noise}}$
 - $v \propto \text{intensity of noise}$
 - independent of noise
 - $v \propto \left(\frac{1}{\text{intensity of noise}} \right)^2$

5. Action reaction pair of force always :

- (1) Cancelled each other
- (2) Never cancelled each other
- (3) May be cancel
- (4) None of these

6. A block moves down a smooth inclined plane of inclination θ . Its velocity on reaching the bottom is v . If it slides down a rough inclined plane of some inclination. Its velocity on reaching the bottom is $\frac{v}{n}$. The coefficient of friction is given by:

- (1) $\mu = \tan\theta\left(1 - \frac{1}{n^2}\right)$
- (2) $\mu = \cot\theta\left(1 - \frac{1}{n^2}\right)$
- (3) $\mu = \tan\theta\left(1 - \frac{1}{n^2}\right)^{1/2}$
- (4) $\mu = \cot\theta\left(1 - \frac{1}{n^2}\right)^{1/2}$

7. A bomb explodes in mid-air when it has a horizontal velocity of 20 ms^{-1} . It breaks into two pieces A and B having masses in ratio $1 : 2$. If A goes vertically at speed 80 ms^{-1} , the speed of B will be :

- (1) 40 ms^{-1} (2) 50 ms^{-1}
- (3) 60 ms^{-1} (4) 100 ms^{-1}

8. Two cars A and B started their motion simultaneously with uniform velocity as shown in figure. Find the shortest distance between them :

- (1) 20 m (2) 40 m
- (3) 100 m (4) 15 m

5. Action reaction pair of force always :

- (1) Never cancelled each other
- (2) May be cancel
- (3) Cancelled each other
- (4) None of these

6. A block moves down a smooth inclined plane of inclination θ . Its velocity on reaching the bottom is v . If it slides down a rough inclined plane of some inclination. Its velocity on reaching the bottom is $\frac{v}{n}$. The coefficient of friction is given by:

- (1) $\mu = \tan\theta\left(1 - \frac{1}{n^2}\right)$
- (2) $\mu = \cot\theta\left(1 - \frac{1}{n^2}\right)$
- (3) $\mu = \tan\theta\left(1 - \frac{1}{n^2}\right)^{1/2}$
- (4) $\mu = \cot\theta\left(1 - \frac{1}{n^2}\right)^{1/2}$

7. A bomb explodes in mid-air when it has a horizontal velocity of 20 ms^{-1} . It breaks into two pieces A and B having masses in ratio $1 : 2$. If A goes vertically at speed 80 ms^{-1} , the speed of B will be :

- (1) 40 ms^{-1} (2) 50 ms^{-1}
- (3) 60 ms^{-1} (4) 100 ms^{-1}

8. Two cars A and B started their motion simultaneously with uniform velocity as shown in figure. Find the shortest distance between them :

- (1) 20 m (2) 40 m
- (3) 100 m (4) 15 m

9. Which of the following figures represents the motion of a body moving in a straight line under constant acceleration :

10. Work done by centripetal force in a non-uniform circular motion is:

- (1) zero
- (2) non-zero
- (3) may be zero
- (4) never zero.

11. A child sits stationary at one end of a long trolley moving uniformly with a speed V on a smooth horizontal floor. If the child gets up and runs about on the trolley in any manner, what is the speed of the CM of the (trolley + child) system :

- (1) $2V$
- (2) $4V$
- (3) 0
- (4) V

12. The driver of a three-wheeler moving with a speed of 36 km/h sees a child standing in the middle of the road and brings his vehicle to rest in 4.0 s just in time to save the child. What is the average retarding force on the vehicle ? The mass of the three-wheeler is 400 kg and the mass of the driver is 65 kg :

- (1) $1.2 \times 10^4 \text{ N}$
- (2) $1.2 \times 10^3 \text{ N}$
- (3) $1.3 \times 10^2 \text{ N}$
- (4) $1.2 \times 10^5 \text{ N}$

- (3) $1.3 \times 10^2 \text{ N}$
- (4) $1.2 \times 10^5 \text{ N}$

13. A vibratory motion is represented by

$$x = 2A \cos \omega t + A \cos \left(\omega t + \frac{\pi}{2} \right) + A \cos(\omega t + \pi) + \frac{A}{2} \cos \left(\omega t + \frac{3\pi}{2} \right)$$

The resultant amplitude of the motion is :

- (1) $\frac{9A}{2}$ (2) $\frac{\sqrt{5} A}{2}$
 (3) $\frac{5A}{2}$ (4) $2A$

14. If $\vec{r}, \vec{\omega}, \vec{v}$ and $\vec{\alpha}$ are radius vector, angular velocity, linear velocity and angular acceleration of a particle executing circular motion. Which of the following relation is correct

- (1) $\vec{\omega} \cdot \vec{v} > 0$
 (2) $(\vec{\omega} \times \vec{v}) \cdot (\vec{\alpha} \times \vec{r}) = 0$
 (3) $(\vec{\alpha} \times \vec{r}) \cdot \vec{\omega} < 0$
 (4) $(\vec{\omega} \times \vec{\alpha}) \cdot (\vec{v} \times \vec{r}) > 0$

15. A particle is moving on a vertical circular path of radius r about centre O shown in fig(Anticlockwise). The string connecting the particle and centre O has length r and is massless. The direction of acceleration of the particle when it is at A may be along

- (1) AO (2) AC
 (3) AD (4) AB

16. A solid sphere rolls up a rough incline plane. The friction force is:

- (1) Acting down the incline
 (2) Zero
 (3) Acting up the incline
 (4) Dependent on the speed

13.

$$x = 2A \cos \omega t + A \cos \left(\omega t + \frac{\pi}{2} \right) + A \cos(\omega t + \pi) + \frac{A}{2} \cos \left(\omega t + \frac{3\pi}{2} \right)$$

17. A disc of mass M and radius R is free to rotate in vertical plane about an axis xx' shown in fig. It is released from topmost position, its velocity of centre of mass at lowest position is:

- (1) \sqrt{gR} (2) $\sqrt{\frac{16}{5}gR}$
 (3) $\sqrt{\frac{8}{3}gR}$ (4) $\sqrt{8gR}$

18. If a particle of mass 2 kg moves along a line $y = x + 2$ with the uniform velocity 2 m/s. Find its angular momentum about the origin :

- (1) $4\sqrt{2}$ kg m²/s
 (2) $\frac{4}{\sqrt{2}}$ kg m²/s
 (3) 4 kg m²/s
 (4) 8 kg m²/s

19. A body of mass m is dropped from $2R$ from the surface of earth. The speed of body just before hitting the earth's surface will be [R is radius of earth, g is acceleration due to gravity]:

- (1) \sqrt{gR} (2) $2\sqrt{\frac{gR}{3}}$
 (3) $\frac{\sqrt{gR}}{2}$ (4) $2\sqrt{gR}$

17.

Disc of mass M and radius R is free to rotate in vertical plane about an axis xx' shown in fig. It is released from topmost position, its velocity of centre of mass at lowest position is:

- (1) \sqrt{gR} (2) $\sqrt{\frac{16}{5}gR}$
 (3) $\sqrt{\frac{8}{3}gR}$ (4) $\sqrt{8gR}$

18. If a particle of mass 2 kg moves along a line $y = x + 2$ with the uniform velocity 2 m/s. Find its angular momentum about the origin :

- (1) $4\sqrt{2}$ kg m²/s
 (2) $\frac{4}{\sqrt{2}}$ kg m²/s
 (3) 4 kg m²/s
 (4) 8 kg m²/s

19. A body of mass m is dropped from $2R$ from the surface of earth. The speed of body just before hitting the earth's surface will be [R is radius of earth, g is acceleration due to gravity]:

- (1) \sqrt{gR} (2) $2\sqrt{\frac{gR}{3}}$
 (3) $\frac{\sqrt{gR}}{2}$ (4) $2\sqrt{gR}$

20. The acceleration (a) and displacement (x) graph is shown in the figure. The time period of oscillation is:-

- (1) 2π seconds
- (2) 1 seconds
- (3) 2 seconds
- (4) $\frac{1}{2\pi}$

21. A man of mass 50 kg is standing on a plank of length 2m and mass 150 kg, which is placed on a horizontal frictionless floor. If the man walked from end A to B, then actual (i.e. with respect to ground) displacement of the man is:

- (1) 2 m
- (2) 1.5 m
- (3) 0.5 m
- (4) 1 m.

22. In the given figure a body rolls without slipping on a curve path. If maximum height achieved by body is h, then shape of the body is :

- (1) solid sphere
- (2) hollow sphere
- (3) ring
- (4) disc.

20. The acceleration (a) and displacement (x) graph is shown in the figure. The time period of oscillation is:-

- (1) 2π seconds
- (2) 1 seconds
- (3) 2 seconds
- (4) $\frac{1}{2\pi}$

21. A man of mass 50 kg is standing on a plank of length 2m and mass 150 kg, which is placed on a horizontal frictionless floor. If the man walked from end A to B, then actual (i.e. with respect to ground) displacement of the man is:

- (1) 2 m
- (2) 1.5 m
- (3) 0.5 m
- (4) 1 m.

22. In the given figure a body rolls without slipping on a curve path. If maximum height achieved by body is h, then shape of the body is :

- (1) Solid sphere
- (2) Hollow sphere
- (3) Ring
- (4) Disc

23. A particle of mass 2 kg travels along a straight line with velocity $v = b\sqrt{x}$, where b is a constant. The work done by net force during the displacement of particle from $x = 0$ to $x = 4\text{m}$ is :

- (1) b^2
- (2) $2b^2$
- (3) $4b^2$
- (4) $\sqrt{2} b^2$.

24. A body is dropped from rest from height 10 m on a horizontal floor. If coefficient of restitution between body and floor is $\frac{1}{\sqrt{2}}$ then maximum height attained after first collision is :

- (1) 5 m
- (2) 10 m
- (3) 7.5 m
- (4) 2.5 m.

25. Select the false statement:

- (1) In elastic collision, Kinetic energy during the collision is not conserved.
- (2) The coefficient of restitution for a collision between two steel balls lies between zero and one
- (3) The momentum of a ball colliding elastically with the floor is conserved
- (4) In an oblique inelastic collision between two identical bodies with initially one of them at rest, final velocities are perpendicular.

26. A steel meter scale is to be ruled so that millimeter intervals are accurate within about $5 \times 10^{-5}\text{m}$ at a certain temperature. The maximum temperature variation allowable during the ruling is (Coefficient of linear expansion of steel = $10 \times 10^{-6}\text{K}^{-1}$) :

- (1) 2°C
- (2) 5°C
- (3) 7°C
- (4) 10°C

27. During illness an 80 kg man ran a fever of 102.2°F instead of normal body temperature of 98.6°F. Assuming that human body is mostly water, how much heat is required to raise his temperature by that amount :

- (1) 100 kcal
- (2) 160 kcal
- (3) 50 kcal
- (4) 92 kcal

28. A steel ball of mass 0.1 kg falls freely from a height of 10 m and bounces to a height of 5.4m from the ground. If the dissipated energy in this process is absorbed by the ball, the rise in its temperature is (Specific heat of steel = 460 Joule - kg⁻¹ °C⁻¹, g = 10 ms⁻²) :

- (1) 0.01°C
- (2) 1°C
- (3) 0.1°C
- (4) 1.1°C

29. Suppose ideal gas equation follows $VP^3 = \text{constant}$. Initial temperature and volume of the gas are T and V respectively. If gas expand to 27V then its temperature will become :

- (1) T
- (2) 9T
- (3) 27T
- (4) T/9

30. The r.m.s. velocity of a gas at a certain temperature is $\sqrt{2}$ times than that of the oxygen molecules at that temperature. The gas can be :

- (1) H₂
- (2) He
- (3) CH₄
- (4) SO₂

31. One mole of a monoatomic ideal gas is mixed with one mole of a diatomic ideal gas. The molar specific heat of the mixture at constant volume is:

- (1) 8
- (2) 3/2 R
- (3) 2R
- (4) 2.5 R

32. The P-V diagram of 2 gm of helium gas for a certain process A → B is shown in the figure. what is the heat given to the gas during the process A → B :

- (1) $4P_0V_0$ (2) $6P_0V_0$
 (3) $4.5P_0V_0$ (4) $2P_0V_0$

33. A certain mass of gas at 273 K is expanded to 81 times its volume under adiabatic condition. If $\gamma = 1.25$ for the gas, then its final temperature is:

- (1) -235°C
 (2) -182°C
 (3) -91°C
 (4) -0°C

34. If a Carnot's engine functions at source temperature 127°C and at sink temperature 87°C , what is its efficiency :

- (1) 10%
 (2) 25%
 (3) 40%
 (4) 50%

35. In an adiabatic change, the pressure P and temperature T of a monoatomic gas are related by the relation $P \propto T^c$, where c equals :

- (1) 5/3
 (2) 2/5
 (3) 3/5
 (4) 5/2

SECTION-B

36. In a steady state of thermal conduction, temperature of the ends A and B of a 20 cm long rod are 100°C and 0°C respectively. What will be the temperature of the rod at a point at a distance of 6 cm from the end A of the rod :

- (1) -30°C
 (2) 70°C
 (3) 5°C
 (4) 10°C

32. The P-V diagram of 2 gm of helium gas for a certain process A → B is shown in the figure. what is the heat given to the gas during the process A → B :

- (1) $4P_0V_0$ (2) $6P_0V_0$
 (3) $4.5P_0V_0$ (4) $2P_0V_0$

33. A certain mass of gas at 273 K is expanded to 81 times its volume under adiabatic condition. If $\gamma = 1.25$ for the gas, then its final temperature is:

- (1) -235°C
 (2) -182°C
 (3) -91°C
 (4) -0°C

34. If a Carnot's engine functions at source temperature 127°C and at sink temperature 87°C , what is its efficiency :

- (1) 10%
 (2) 25%
 (3) 40%
 (4) 50%

35. In an adiabatic change, the pressure P and temperature T of a monoatomic gas are related by the relation $P \propto T^c$, where c equals :

- (1) 5/3
 (2) 2/5
 (3) 3/5
 (4) 5/2

SECTION-B

36. In a steady state of thermal conduction, temperature of the ends A and B of a 20 cm long rod are 100°C and 0°C respectively. What will be the temperature of the rod at a point at a distance of 6 cm from the end A of the rod :

- (1) -30°C
 (2) 70°C
 (3) 5°C
 (4) 10°C

37. Four rods of silver, copper, brass and wood are of same shape. They are heated together after wrapping a paper on it, the paper will burn first on :

- (1) Silver
- (2) Copper
- (3) Brass
- (4) Wood

38. In the given figure stress and strain curve is shown of material A and B, then the correct option is (T_A and T_B are the temperature of body):

- (1) $y_A > y_B$
- (2) $T_A > T_B$
- (3) $T_B > T_A$
- (4) Both (1) and (3)

39. In a resonance tube, the first resonance is obtained when the level of water in the tube is at 16cm from the open end. Neglecting end correction, the next resonance will be obtained when the level of water from the open end is :

- (1) 24 cm
- (2) 32 cm
- (3) 48 cm
- (4) 64 cm

40. A wave travelling along positive x-axis is given by $y = A \sin(\omega t - kx)$. If it is reflected from rigid boundary such that 80% amplitude is reflected, then equation of reflected wave is

- (1) $y = A \sin(\omega t + kx)$
- (2) $y = -0.8A \sin(\omega t + kx)$
- (3) $y = 0.8A \sin(\omega t + kx)$
- (4) $y = A \sin(\omega t + 0.8 kx)$

- (4) $y = A \sin(\omega t + 0.8 kx)$

41. The frequency of the first harmonic of a string stretched between two points is 100 Hz. The frequency of the third overtone is :

- (1) 200 Hz
- (2) 300 Hz
- (3) 400 Hz
- (4) 600 Hz

42. A stretched wire of length 110 cm is divided into three segments whose frequencies are in ratio 1 : 2 : 3. Their lengths must be :

- (1) 20 cm; 30 cm; 60 cm
- (2) 60 cm; 30 cm; 20 cm
- (3) 60 cm; 20 cm; 30 cm
- (4) 30 cm; 60 cm; 20 cm

43. If n_1, n_2, n_3, \dots are the frequencies of segments of a stretched string, the frequency n of the composite string is given by

- (1) $n = n_1 + n_2 + n_3 + \dots$
- (2) $n = \sqrt{n_1 \times n_2 \times n_3 \times \dots}$
- (3) $\frac{1}{n} = \frac{1}{n_1} + \frac{1}{n_2} + \frac{1}{n_3} + \dots$
- (4) $n = n_1 \times n_2 \times n_3 \times \dots$

44. The equation of stationary wave along a stretched string is given by $y = 5 \sin \frac{\pi x}{3} \cos 40\pi t$ where x and y are in centimetre and t in second. The separation between two adjacent nodes is :

- (1) 6 cm
- (2) 4 cm
- (3) 3 cm
- (4) 1.5 cm

45. The number of beats produced per second by two vibrations: $x_1 = x_0 \sin 646 \pi t$ and $x_2 = x_0 \sin 652 \pi t$ is:

- (1) 2
- (2) 3
- (3) 4
- (4) 6.

41. The frequency of the first harmonic of a string stretched between two points is 100 Hz. The frequency of the third overtone is :

- (1) 200 Hz
- (2) 300 Hz
- (3) 400 Hz
- (4) 600 Hz

42. A stretched wire of length 110 cm is divided into three segments whose frequencies are in ratio 1 : 2 : 3. Their lengths must be :

- (1) 20 cm; 30 cm; 60 cm
- (2) 60 cm; 30 cm; 20 cm
- (3) 60 cm; 20 cm; 30 cm
- (4) 30 cm; 60 cm; 20 cm

43. If n_1, n_2, n_3, \dots are the frequencies of segments of a stretched string, the frequency n of the composite string is given by

- (1) $n = n_1 + n_2 + n_3 + \dots$
- (2) $n = \sqrt{n_1 \times n_2 \times n_3 \times \dots}$
- (3) $\frac{1}{n} = \frac{1}{n_1} + \frac{1}{n_2} + \frac{1}{n_3} + \dots$
- (4) $n = n_1 \times n_2 \times n_3 \times \dots$

44. The equation of stationary wave along a stretched string is given by $y = 5 \sin \frac{\pi x}{3} \cos 40\pi t$ where x and y are in centimetre and t in second. The separation between two adjacent nodes is :

- (1) 6 cm
- (2) 4 cm
- (3) 3 cm
- (4) 1.5 cm

45. The number of beats produced per second by two vibrations: $x_1 = x_0 \sin 646 \pi t$ and $x_2 = x_0 \sin 652 \pi t$ is:

- (1) 2
- (2) 3
- (3) 4
- (4) 6.

46. An object is tied to a string of length l and is revolved in a vertical circle at the minimum velocity. When the object reaches the uppermost point, the string breaks and it describes a parabolic path as shown in the figure under the gravitational force. The horizontal range AC in the plane of A would be:

- (1) l (2) $2l$
 (3) $\sqrt{2}l$ (4) $2\sqrt{2}l$

47. Efflux velocity does't depends upon :

- (1) Density if only single liquid filled
 (2) Density if two immisible liquid are filled
 (3) Depth of orifice from free surface
 (4) Both (1) and (2)

48. Motion under gravity of a particle is :

- (1) a uniform motion
 (2) non-uniform motion
 (3) may be uniform
 (4) non-uniform accelerated motion

49. If an ideal liuqid flows through horizontal pipe as shown in figure (crosssectional area of $B =$ crosssectional area of C)

- (1) $P_C > P_A > P_B$ (2) $P_C > P_B > P_A$
 (3) $P_C = P_B > P_A$ (4) $V_C > V_B > V_A$

50. Starting from rest, a particle rotates in a circle of radius $R = \sqrt{2}$ m with an angular accleration $\alpha = (\pi/4)$ rad/s². The magnitude of average velocity of the particle over the time it rotates quarter circle is :

- (1) 1.5 m/s (2) 2 m/s
 (3) 1 m/s (4) 1.25 m/s

46. An object is tied to a string of length l and is revolved in a vertical circle at the minimum velocity. When the object reaches the uppermost point, the string breaks and it describes a parabolic path as shown in the figure under the gravitational force. The horizontal range AC in the plane of A would be:

- (1) l (2) $2l$
 (3) $\sqrt{2}l$ (4) $2\sqrt{2}l$

47. Efflux velocity does't depends upon :

- (1) Density if only single liquid filled
 (2) Density if two immisible liquid are filled
 (3) Depth of orifice from free surface
 (4) Both (1) and (2)

48. Motion under gravity of a particle is :

- (1) a uniform motion
 (2) non-uniform motion
 (3) may be uniform
 (4) non-uniform accelerated motion

49. If an ideal liuqid flows through horizontal pipe as shown in figure (crosssectional area of $B =$ crosssectional area of C)

- (1) $P_C > P_A > P_B$ (2) $P_C > P_B > P_A$
 (3) $P_C = P_B > P_A$ (4) $V_C > V_B > V_A$

50. Starting from rest, a particle rotates in a circle of radius $R = \sqrt{2}$ m with an angular accleration $\alpha = (\pi/4)$ rad/s². The magnitude of average velocity of the particle over the time it rotates quarter circle is :

- (1) 1.5 m/s (2) 2 m/s
 (3) 1 m/s (4) 1.25 m/s

TOPIC : Full Syllabus (XI-MODEL)

Atomic Masses : H=1, He=4, C=12, N=14, O=16, Na=23, Mg=24, P=31, S=32, Cl=35.5, K=39, Ca=40, Fe=56, Cu=63.5, Br=80, Ag=108, I=127, Ba=137, Au=197

SECTION-A

51. For the reaction,

If bond energies of A₂, B₂ and AB are respectively x, x/2 and x k cal, the value of x is :

- (1) 50
- (2) 100
- (3) 200
- (4) 400.

52. Enthalpy of combustion of a substance is always :

- (1) > 0
- (2) ≥ 0
- (3) ≤ 0
- (4) < 0.

53. When acetone react with hydroxylamine then product (oxime) will form which will show isomerism :

- (1) Optical isomerism
- (2) Geometrical isomerism
- (3) Conformational isomerism
- (4) None of these

54. Maximum enol content is in :

55. Glycerol is purified by :

- (1) steam distillation
- (2) vaccum distillation
- (3) sublimation
- (4) simple distillation

SECTION-A

51. For the reaction,

If bond energies of A₂, B₂ and AB are respectively x, x/2 and x k cal, the value of x is :

- (1) 50
- (2) 100
- (3) 200
- (4) 400.

| d. $\text{C}_2\text{H}_5\text{Br} \rightarrow \text{C}_4\text{H}_{10}$ | s. HI/red P |

- (1) a-p, b-s, c-q, d-r
 (2) a-q, b-p, c-s, d-r
 (3) a-s, b-r, c-p, d-q
 (4) a-q, b-r, c-s, d-p

77. Which of the following has highest knocking property :

- (1) Aromatic hydrocarbons
 (2) Olefins
 (3) Branched chain paraffins
 (4) Straight chain paraffins

78. Which of the following are incorrect (regarding oxidation number) :

- (1) Oxidation number of P in hypophosphorous acid is +1
 (2) Oxidation number of P in phosphorus acid is +3
 (3) Oxidation number of P in pyrophosphoric acid is +5
 (4) Oxidation number of P in ortho-phosphoric acid is +3

79. The oxidation number of S in $\text{Na}_2\text{S}_4\text{O}_6$ is :

- (1) +2
 (2) +2 and +3 (two S have +2 and other two have +3).
 (3) +2 and +3 (three S have +2 and one S has +3).
 (4) +5 and 0 (two S have +5 and the other two S have 0).

80. For a given mass of a gas, if pressure is reduced to half and temperature is increased two times, then the volume would become :

- (1) V/4
 (2) $2V^2$
 (3) 6V
 (4) 4V

81. Greatest amount of energy involve in the transformation of:

- (1) $\text{Li}^+ \rightarrow \text{Li}^{+2} + e$
- (2) $\text{K}^+ \rightarrow \text{K}^{++} + e$
- (3) $\text{Na}^+ \rightarrow \text{Na}^{+2} + e$
- (4) $\text{Ne} \rightarrow \text{Ne}^+ + e$

82. Generally, the first ionisation energy increases along the third period. But there are some exceptions, the exception is/are :

- A. P and S
- B. Na and Mg
- C. Mg and Al
- D. Be and B

- (1) A, C & D only
- (2) A & C only
- (3) A, B, C & D
- (4) Only B

83. In an octahedral structure, the pair of d-orbitals involved in d^2sp^3 -hybridisation is

- (1) $d_{x^2-y^2}, d_{z^2}$
- (2) $d_{xy}, d_{x^2-y^2}$
- (3) d_{z^2}, d_{xz}
- (4) d_{xy}, d_{yz}

84. Which of the following statement is incorrect :

- (1) Two nodal planes result when two wave functions overlap axially in opposite phase.
- (2) The shape of NH_3 molecule changes from pyramidal to tetrahedral when it is bonded with BF_3
- (3) In O_3 molecule the formal charge on central oxygen atom is +1
- (4) All of these

85. Some of the properties of two species NO_3^- and H_3O^+ are described below. Which one of them is correct

- (1) Dissimilar in hybridization for the central atom with different structures
- (2) Isostructural with same hybridization for the central atom
- (3) Isostructural with different hybridization for the central atom
- (4) Similar in hybridization for the central atom with different structures

86. What will be the bond order of N, N and N, O bond in nitrous oxide respectively :

- (1) between 1 and 2, 2 and 3
- (2) between 2 and 3, 1 and 3
- (3) between 2 and 3, 1 and 2
- (4) between 1 and 2, 1 and 3

87. The five d-orbitals are designated as d_{xy} , d_{yz} , d_{xz} , $d_{x^2-y^2}$ and d_{z^2} . The shapes of four d-orbitals are same. Then which one have different shape :

- (1) d_{z^2}
- (2) $d_{x^2-y^2}$
- (3) d_{xy}
- (4) d_{yz}

88. In PO_4^{3-} , the formal charge on each oxygen atom and the P - O bond order respectively are :

- (1) -0.75, 0.6
- (2) -0.75, 1.0
- (3) -0.75, 1.25
- (4) -3, 1.25

89. The correct order of size among O , O^{2-} , F and F^- is :

- (1) $O^{2-} > O > F^- > F$
- (2) $O > O^{2-} > F > F^-$
- (3) $O^{2-} > F^- > F > O$
- (4) $O^{2-} > F^- > O > F$

90. Percentage of p-character in the orbital forming P-P bond in P_4 molecule :

- (1) 25%
- (2) 50%
- (3) 75%
- (4) can't predict

91. On de electronation of nitric oxide, electron comes out form :

- (1) $\pi^* 2px$
- (2) $\pi 2px$
- (3) $\sigma^* 2px$
- (4) None of these

86. What will be the bond order of N, N and N, O bond in nitrous oxide respectively :

- (1) between 1 and 2, 2 and 3
- (2) between 2 and 3, 1 and 3
- (3) between 2 and 3, 1 and 2
- (4) between 1 and 2, 1 and 3

87. The five d-orbitals are designated as d_{xy} , d_{yz} , d_{xz} , $d_{x^2-y^2}$ and d_{z^2} . The shapes of four d-orbitals are same. Then which one have different shape :

- (1) d_{z^2}
- (2) $d_{x^2-y^2}$
- (3) d_{xy}
- (4) d_{yz}

88. In PO_4^{3-} , the formal charge on each oxygen atom and the P - O bond order respectively are :

- (1) -0.75, 0.6
- (2) -0.75, 1.0
- (3) -0.75, 1.25
- (4) -3, 1.25

89. The correct order of size among O , O^{2-} , F and F^- is :

- (1) $O^{2-} > O > F^- > F$
- (2) $O > O^{2-} > F > F^-$
- (3) $O^{2-} > F^- > F > O$
- (4) $O^{2-} > F^- > O > F$

90. Percentage of p-character in the orbital forming P-P bond in P_4 molecule :

- (1) 25%
- (2) 50%
- (3) 75%
- (4) can't predict

91. On de electronation of nitric oxide, electron comes out form :

- (1) $\pi^* 2px$
- (2) $\pi 2px$
- (3) $\sigma^* 2px$
- (4) None of these

92. The bleaching power of bleaching powder decreases with time due to :

- (1) Stabilisation of chlorine as CaOCl and $\text{Ca}(\text{OCl})_2$
- (2) Stabilisation of chlorine as CaOCl and $\text{Ca}(\text{ClO}_3)_2$
- (3) Stabilisation of chlorine as CaOCl and $\text{Ca}(\text{ClO}_4)_2$
- (4) Stabilisation of chlorine as CaCl_2 and $\text{Ca}(\text{ClO}_3)_2$

93. Which is amphoteric in nature :

- (1) SiO_2
- (2) SnO_2
- (3) PbO_2
- (4) CO_2

94. When sodium is treated with sufficient oxygen/air, the product obtained is :

- (1) Na_2O
- (2) Na_2O_2
- (3) NaO_2
- (4) NaO

95. The weakest base among NaOH , $\text{Ca}(\text{OH})_2$, KOH and $\text{Be}(\text{OH})_2$ is :

- (1) NaOH
- (2) $\text{Ca}(\text{OH})_2$
- (3) KOH
- (4) $\text{Be}(\text{OH})_2$

96. The correct order of increasing thermal stability of K_2CO_3 , MgCO_3 , CaCO_3 and BeCO_3 is :

- (1) $\text{BeCO}_3 < \text{MgCO}_3 < \text{K}_2\text{CO}_3 < \text{CaCO}_3$
- (2) $\text{BeCO}_3 < \text{MgCO}_3 < \text{CaCO}_3 < \text{K}_2\text{CO}_3$
- (3) $\text{MgCO}_3 < \text{BeCO}_3 < \text{CaCO}_3 < \text{K}_2\text{CO}_3$
- (4) $\text{K}_2\text{CO}_3 < \text{MgCO}_3 < \text{CaCO}_3 < \text{BeCO}_3$

97. Arrange the following in increasing order of Lewis acid character :

- a. BF_3 b. BCl_3
c. BBr_3 d. BI_3

- (1) $a < b < c < d$
- (2) $d < c < a < b$
- (3) $a < d < b < c$
- (4) $d < c < b < a$

92. The bleaching power of bleaching powder decreases with time due to :

- (1) Stabilisation of chlorine as CaOCl and $\text{Ca}(\text{OCl})_2$
- (2) Stabilisation of chlorine as CaOCl and $\text{Ca}(\text{ClO}_3)_2$
- (3) Stabilisation of chlorine as CaOCl and $\text{Ca}(\text{ClO}_4)_2$
- (4) Stabilisation of chlorine as CaCl_2 and $\text{Ca}(\text{ClO}_3)_2$

93. Which is amphoteric in nature :

- (1) SiO_2
- (2) SnO_2
- (3) PbO_2
- (4) CO_2

94. When sodium is treated with sufficient oxygen/air, the product obtained is :

- (1) Na_2O
- (2) Na_2O_2
- (3) NaO_2
- (4) NaO

95. The weakest base among NaOH , $\text{Ca}(\text{OH})_2$, KOH and $\text{Be}(\text{OH})_2$ is :

- (1) NaOH
- (2) $\text{Ca}(\text{OH})_2$
- (3) KOH
- (4) $\text{Be}(\text{OH})_2$

96. The correct order of increasing thermal stability of K_2CO_3 , MgCO_3 , CaCO_3 and BeCO_3 is :

- (1) $\text{BeCO}_3 < \text{MgCO}_3 < \text{K}_2\text{CO}_3 < \text{CaCO}_3$
- (2) $\text{BeCO}_3 < \text{MgCO}_3 < \text{CaCO}_3 < \text{K}_2\text{CO}_3$
- (3) $\text{MgCO}_3 < \text{BeCO}_3 < \text{CaCO}_3 < \text{K}_2\text{CO}_3$
- (4) $\text{K}_2\text{CO}_3 < \text{MgCO}_3 < \text{CaCO}_3 < \text{BeCO}_3$

97. Arrange the following in increasing order of Lewis acid character :

- a. BF_3 b. BCl_3
c. BBr_3 d. BI_3

- (1) $a < b < c < d$
- (2) $d < c < a < b$
- (3) $a < d < b < c$
- (4) $d < c < b < a$

98. Which of the following statement is correct for orthoboric acid :

- a. It can be prepared by acidifying an aqueous solution of borax.
- b. It has a layer structure in which planer BO_3 units are jointed by H-bonding
- c. It is highly soluble in cold water

- (1) a, b and c
- (2) a and b
- (3) b and c
- (4) a and c

99. Correct order of thermal stability of following compound is :

- (1) $\text{GeCl}_2 < \text{SiCl}_2 < \text{SnCl}_2 < \text{PbCl}_2$
- (2) $\text{SiCl}_2 < \text{GeCl}_2 < \text{PbCl}_2 < \text{SnCl}_2$
- (3) $\text{SiCl}_2 < \text{GeCl}_2 < \text{SnCl}_2 < \text{PbCl}_2$
- (4) $\text{PbCl}_2 < \text{SnCl}_2 < \text{GeCl}_2 < \text{SiCl}_2$

100. Which of the following statement is correct :

- i. Fullerenes have dangling bonds
- ii. Fullerenes are cage-like molecules
- iii. Graphite is most pure form of carbon
- iv. Thermodynamically most stable allotropic form of carbon is graphite.

- (1) i and ii
- (2) ii and iii
- (3) ii and iv
- (4) i, ii, iii and iv

TOPIC : Full Syllabus [NCERT- I]

SECTION-A - [BOTANY]

101. Which of the following contains the actual account of habitat and distribution of plants of a given area:

- (1) Fauna
- (2) Flora
- (3) Both 1 and 2
- (4) Monographs

102. In which kingdom cell wall are absent :

- (1) Animalia
- (2) Fungi
- (3) Plantae
- (4) Monera

103. In members of Phaeophyceae their body is differentiated into holdfast, stipe, frond. What is the function of holdfast and frond respectively

- (1) Attachement, photosynthesis
- (2) Photosynthesis, attachement
- (3) Attachement only
- (4) Photosynthesis only

104. Which of the following is not a animal tissue

- (1) Epithelial
- (2) Connective
- (3) Meristematic
- (4) Neural

105. Which structure is not related to the excretion of cockroach :

- (1) Urecoase gland
- (2) Nephrocytes
- (3) Fat body
- (4) Green gland

106. Which one of the following is the incorrect match

- (1) C₄ plant - Respond higher temperature
- (2) Photorespiration - Wastefull process
- (3) C₃ plant - 30 ATP used in calvin cycle
- (4) RUBISCO - C₄ plant

 (3) a-ii, b-i, c-iii, d-iv
 (4) a-i, b-iii, c-iv, d-ii

112. Who among the following saw and described a living cell first time :

- (1) Anton Von Leeuwenhoek
- (2) Robert Brown
- (3) Matthias Schleiden
- (4) Theodore Schwann

113. Golgi apparatus were observed by Camillo Golgi in 1898. Which of the following is wrong statement regarding it :

- (1) Diameter of cisternae is 5 μm to 10 μm
- (2) The golgi cisternae are concentrically arranged near the mitochondria
- (3) It is site of formation of glycoprotein and glycolipid
- (4) Both 1 and 2

114. Which of the following option is incorrect :

- (1) Imbibition is diffusion of water against the concentration gradient
- (2) Water potential gradient between the absorbent and the liquid imbibed is essential for imbibition
- (3) In hypotonic solution there is higher water potential as compared to cytoplasm
- (4) Absorption of water by seeds and dry wood is example of imbibition.

115. Which one of the following is not a micronutrient

- (1) Copper
- (2) Molybdenum
- (3) Magnesium
- (4) Manganese

116. Essential elements that are component of energy related chemical compounds in plants :

- (1) Mg in chlorophyll
- (2) P in ATP
- (3) Both (1) and (2)
- (4) Oxygen.

117. Organism normally aerobic but becomes anaerobic in extreme conditions are called :

- (1) Obligate aerobic
- (2) Facultative aerobic
- (3) Obligate anaerobic
- (4) Facultative anaerobic.

118. At how many places in the kreb cycle is NAD^+ reduced to $NADH+H^+$, and FAD^+ reduced to $FADH_2$, respectively:

- (1) One and three
- (2) Three and one
- (3) Two and one
- (4) Three and two

119. Residual volume is :

- (1) Greater than vital capacity
- (2) Greater than tidal volume
- (3) Lesser than tidal volume
- (4) Greater than inspiratory reserve volume

120. Which of the following are not a part of gastric juice

- (a) Pepsinogen
- (b) Enterogastrone
- (c) Gastric lipase
- (d) Prorennin
- (e) Amylase

- (1) b and e
- (2) a, c and d
- (3) a, c and e
- (4) b, c and d

121. The important muscle proteins that help in movement are

- (1) Actin and myosin
- (2) Tropomyosin
- (3) Troponin
- (4) All of these

122. The principal nitrogenous excretory compound in humans is synthesised :

- (1) In kidneys but eliminated mostly through liver
- (2) In kidneys as well as eliminated by kidneys
- (3) In liver and also eliminated by the same through bile
- (4) In the liver, but eliminated mostly through kidneys

123. Which of the following are the specific receptors of the vestibular apparatus responsible for maintenance of balance of the body and posture:

- (1) Crista and Organ of corti
- (2) Macula and Organ of corti
- (3) Organ of corti and Otolith
- (4) Macula and Crista

124. Which one of the following are viviparous and oviparous mammals respectively :

- (1) Delphinus, Platypus
- (2) Platypus, Pteropus
- (3) Platypus, Panthera
- (4) More than one option are correct

125. Assertion : Scientist believed that reptiles are ancestor of birds.

Reason : In birds scales are present on Hind limb

- (1) Both (A) and (R) are true but (R) is not the correct explanation of (A)
- (2) (A) is true but (R) is false
- (3) (A) is false but (R) is true
- (4) Both (A) and (R) are true and (R) is the correct explanation of (A)

126. Expanded petiole perform photosynthesis in :

- (1) Onion
- (2) Australian acacia
- (3) Calotropis
- (4) Alstonia

127. Which of the following phases of the cell cycle is not a part of interphase:

- (1) S
- (2) G₁
- (3) G₂
- (4) M

128. The first stable product of Calvin cycle and Hatch and Slack cycle are:

- (1) 4-C and 3-C compound
- (2) 4-C and 6-C compound
- (3) 3-C and 4-C compound
- (4) 5-C and 4-C compound

129. A layer of alimentary canal forms irregular folds in different part what is the name of layer and their irregular folds respectively :

- a. Sub Mucosa, Rugae in stomach
- b. Mucosa, villi in stomach
- c. Mucosa, Rugae in stomach
- d. Mucosa, villi in intestine

- (1) c, d
- (2) Only d
- (3) a, d
- (4) b, d

130. What is the correct sequence of organisation of skeletal muscles :

- (1) Myofibrils → Muscle fibre → Fascicles → Skeletal muscle
- (2) Myofibrils → Fascicles → Muscle fibre → Skeletal muscle
- (3) Muscle fibre → Myofibrils → Fascicles → Skeletal muscles
- (4) Myofibrils → Fascicles → Skeletal muscles → Muscle fibre.

131. In most higher plants, the growing apical bud inhibits the growth of the axillary buds. This phenomenon is known as:

- (1) Lateral dominance
- (2) Parthenocarpy
- (3) Apical dominance
- (4) Lodging

- (1) Abscisic acid
- (2) Auxin
- (3) Gibberellin
- (4) Ethylene

SECTION-A - [ZOOLOGY]

151. Read carefully and choose the correct statement.

- (1) The juxta-medullary nephrons have small Henle's loop
- (2) The PCT and DCT are situated in the medulla part of the kidney
- (3) The glomerulus encloses the Bowman's capsule
- (4) The ascending limb of Henle's loop extends as the DCT

152. A person in your home suddenly feel earthquakes then what is the immediate condition in the body:

- a. Glycogenolysis
- b. Glycogenesis
- c. Breakdown of lipids and proteins
- d. Decrease the strength of heart contraction

- (1) a, c
- (2) a, d
- (3) Only a
- (4) b, c

149. Match the following Columns :

Column I	Column II
a. Adenine derivative	i. Ethylene
b. Terpenes derivatives	ii. Gibberellic acid
c. Gaseous hormone	iii. Kinetin
d. Carotenoide derivative	iv. Abscisic acid

- (1) a-i, b-ii, c-iii, d-iv
- (2) a-i, b-iii, c-ii, d-iv
- (3) a-ii, b-i, c-iii, d-iv
- (4) a-iii, b-ii, c-i, d-iv

150. Respiratory climactic effect is shown by which PGR:

- (1) Abscisic acid
- (2) Auxin
- (3) Gibberellin
- (4) Ethylene

SECTION-A - [ZOOLOGY]

151. Read carefully and choose the correct statement.

- (1) The juxta-medullary nephrons have small Henle's loop
- (2) The PCT and DCT are situated in the medulla part of the kidney
- (3) The glomerulus encloses the Bowman's capsule
- (4) The ascending limb of Henle's loop extends as the DCT

152. A person in your home suddenly feel earthquakes then what is the immediate condition in the body:

- a. Glycogenolysis
- b. Glycogenesis
- c. Breakdown of lipids and proteins
- d. Decrease the strength of heart contraction

- (1) a, c
- (2) a, d
- (3) Only a
- (4) b, c

153. Which one of the following is the incorrect match

- (1) Hyperthyroidism - Graves disease
- (2) Hypothyroidism - Goitre
- (3) Thymosine - CMI
- (4) Thyroid gland - Thymosine

154. The multipolar neuron's contains :

- (1) One axon and two or more dendrites
- (2) Many axon and one dendrite
- (3) Many axon and two or more dendrites
- (4) One axon and one dendrites

155. In laboratory there are three sample of brain which are placed for study. These samples are X, Y, Z.

- In sample X, Y, Z 12 pair cranial nerves occurs.
- In sample Z corpus callosum occurs.

What is the correct conclusion for these brain samples -

- a. X, Y brain sample may be of reptiles and birds brain.
- b. X, Y brain sample may be of amphibian, reptiles, birds brain.
- c. Z brain sample surely only mammalian brain.
- d. Z brain sample may be of birds or mammalian brain.

- (1) a, b, c
- (2) a, c
- (3) a, b
- (4) Only d

156. The junction between a motor neuron and the sarcolemma of the muscle fibre is called the

- (1) Sensory end plate
- (2) Motor end plate
- (3) A band
- (4) I band

157. Which is a correct statement

- (a) Fibrinogen helps in maintenance of osmotic pressure
- (b) Glucose is absent in plasma
- (c) Serum does not clot
- (d) Lymph is a connective tissue

- (1) a & b
- (2) b & c
- (3) c & d
- (4) a & d

158. Which excretory structures are found in cephalochordate :

- (1) Ureose gland
- (2) Kidney
- (3) Protonephridia
- (4) Antennal gland

159. Which one of the following statements are correct with reference to given diagram of different plants:

- a. All given plant are cryptogams
- b. All given plant are same type of life cycle pattern
- c. All given plant are produced motile male gamete
- d. All given plants are contains chlorophyll a

- (1) a, d
- (2) c, d
- (3) a, b, d
- (4) Only d

160. Which one of the following statements are correct

- (1) Sequoia is one of the tallest tree species of pteridophytes
- (2) Mycorrhiza are association of Amensalism
- (3) Coralloid roots of cycas are symbiotic association
- (4) All of these

161. In the given below example. How many plants are phanerogams

Spirogyra, Sargassum, Fern, Funaria, Cycas, Pinus, Volvox, Adiantum, Salvinia, Equisetum, Ginkgo, Psilotum

- (1) 9
- (2) 3
- (3) 4
- (4) 5

162. Monocotyledonous, Muscidae and Angiospermae are respectively :

- (1) Class, Family, Phylum
- (2) Class, Family, Division
- (3) Family, Class, Phylum
- (4) Division, Family, Class

163. Which is a correct matching set :

Column I	Column II
(a) Outer ear joint	(i) Involuntary
(b) Blood formation	(ii) Voluntary
(c) Biceps	(iii) Cartilage
(d) Cardiac	(iv) Bone marrow

- (1) a-iii, b-iv, c-ii, d-i
- (2) a-iv, b-iii, c-i, d-ii
- (3) a-iv, b-ii, c-iii, d-i
- (4) a-iii, b-iv, c-i, d-ii

164. Match the following and choose the correct combination from the option given below

Column - I	Column - II
(Organic compound)	(Example)
(a) Fatty acid	(i) Glutamic acid
(b) Phospholipid	(ii) Tryptophan
(c) Aromatic amino acid	(iii) Lecithin
(d) Acidic amino acid	(iv) Palmitic acid

- (1) a-i, b-ii, c-iii, d-iv
- (2) a-ii, b-iii, c-iv, d-i
- (3) a-iv, b-iii, c-ii, d-i
- (4) a-iii, b-iv, c-i, d-ii

161. In the given below example. How many plants are phanerogams

- (1) 9
- (2) 3
- (3) 4
- (4) 5

162. Monocotyledonous, Muscidae and Angiospermae are respectively :

- (1) Class, Family, Phylum
- (2) Class, Family, Division
- (3) Family, Class, Phylum
- (4) Division, Family, Class

163. Which is a correct matching set :

Column I	Column II
(a) Outer ear joint	(i) Involuntary
(b) Blood formation	(ii) Voluntary
(c) Biceps	(iii) Cartilage
(d) Cardiac	(iv) Bone marrow

- (1) a-iii, b-iv, c-ii, d-i
- (2) a-iv, b-iii, c-i, d-ii
- (3) a-iv, b-ii, c-iii, d-i
- (4) a-iii, b-iv, c-i, d-ii

164. Match the following and choose the correct combination from the option given below

Column - I	Column - II
(Organic compound)	(Example)
(a) Fatty acid	(i) Glutamic acid
(b) Phospholipid	(ii) Tryptophan
(c) Aromatic amino acid	(iii) Lecithin
(d) Acidic amino acid	(iv) Palmitic acid

- (1) a-i, b-ii, c-iii, d-iv
- (2) a-ii, b-iii, c-iv, d-i
- (3) a-iv, b-iii, c-ii, d-i
- (4) a-iii, b-iv, c-i, d-ii

165. Select the correct option with reference to enzyme:

- i. Holoenzyme = Apoenzyme + Co-factor
- ii. Holoenzyme = Apoenzyme + Co-enzyme
- iii. Holoenzyme = Apoenzyme + Metal ions
- iv. Holoenzyme = Apoenzyme + Prosthetic group

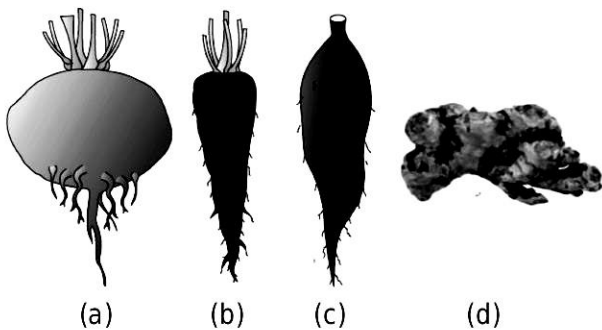

- (1) (i) is false but (ii) is true
- (2) (i) and (ii) are false but (iii) and (iv) are true
- (3) (i), (ii) and (iii) are false but (iv) are true
- (4) All are correct

166. Assertion : In Humans due to non functioning of parietal or oxyntic cell protein digestion effected.

Reason : Parietal cell or oxyntic cell secretes HCl that are necessary for conversion of pepsinogen to pepsin.

- (1) Both (A) and (R) are true but (R) is not the correct explanation of (A)
- (2) (A) is true but (R) is false
- (3) (A) is false but (R) is true
- (4) Both (A) and (R) are true and (R) is the correct explanation of (A)

167. In the given below diagram how many structure are modification of Tap root :

- (1) 7
- (2) 1
- (3) 2
- (4) 3

165. Select the correct option with reference to enzyme:

- i. Holoenzyme = Apoenzyme + Co-factor
- ii. Holoenzyme = Apoenzyme + Co-enzyme
- iii. Holoenzyme = Apoenzyme + Metal ions
- iv. Holoenzyme = Apoenzyme + Prosthetic group

- (1) (i) is false but (ii) is true
- (2) (i) and (ii) are false but (iii) and (iv) are true
- (3) (i), (ii) and (iii) are false but (iv) are true
- (4) All are correct

166. Assertion : In Humans due to non functioning of parietal or oxyntic cell protein digestion effected.

Reason : Parietal cell or oxyntic cell secretes HCl that are necessary for conversion of pepsinogen to pepsin.

- (1) Both (A) and (R) are true but (R) is not the correct explanation of (A)
- (2) (A) is true but (R) is false
- (3) (A) is false but (R) is true
- (4) Both (A) and (R) are true and (R) is the correct explanation of (A)

167. In the given below diagram how many structure are modification of Tap root :

- (1) 7
- (2) 1
- (3) 2
- (4) 3

168. Which one of the following is the correct statement

- (1) Vegetative cell present in embryosac
- (2) Generative cell present in embryosac
- (3) Only diploid nuclei are present in embryosac
- (4) Ploidy of antipodal cell and vegetative cell are similar

169. Which one of the following is the incorrect match

- (1) PEM - Marasmus
- (2) PEM - Kwashiorkar
- (3) Vomit centre - Cerebellum
- (4) Jaundice - Bile pigments

170. Which one of the following is the correct match

- (1) Total fore limbs bone - 50
- (2) Total hind limbs bone - 55
- (3) Coxal bone - Axial skeleton
- (4) Scapula - Pectoral girdle

171. Which among the following is not a prokaryotic cell:

- (1) Bacteria
- (2) Blue green algae
- (3) Mycoplasma
- (4) Yeast

172. Class of enzymes contained in lysosome :

- (1) Lyases
- (2) Ligases
- (3) Hydrolases
- (4) Transferases.

173. Tonoplast is differentially permeable membrane surrounding the :

- (1) Mitochondria
- (2) Cytoplasm
- (3) Vacuole
- (4) Nucleus

174. The splitting of the centromere of each chromosome occur :

- (1) Telophase I
- (2) Anaphase I
- (3) Anaphase II
- (4) Metaphase II

175. Which is a correct statement :

- (a) AV node is called as pace maker
- (b) Atrial systole causes 30% ventricular filling
- (c) Cardiac output depends on ventricular filling
- (d) Blood pumped during a cardiac cycle is cardiac output

- (1) a & b
- (2) b & c
- (3) c & d
- (4) a & d

176. What is/are most correct regarding reaction centre

- (1) Reaction centre is single chlorophyll 'a' molecule
- (2) The reaction centre is different in both photosystems
- (3) Reaction centre is formed by accessory pigments
- (4) Both 1 and 2

177. Which statement is correct :

- (1) Squamous epithelium are found in fallopian tube
- (2) Two types of cell junctions are found in the epithelium and other tissues
- (3) Neural tissue exerts the greatest control over the body's responsiveness to changing conditions
- (4) The simple squamous epithelium is made of more than one layer of cells

178. Which of the following statement is true regarding blood vascular system of Pheretima

- (1) Contraction keep blood circulation in one direction only
- (2) Smaller blood vessels supply blood to gut, nerve cord and body wall
- (3) Haemoglobin is dissolved in blood plasma and blood cells are phagocytic in nature
- (4) All are true

192. Which one of the following events belongs to telophase:

- (1) Chromosome at opposite poles and lost their identity as discrete elements
- (2) Nucleolus, ER are reform
- (3) Nuclear envelope develops
- (4) All of these

193. The Longest phase of cell cycle is :

- (1) Interphase
- (2) Metaphase
- (3) Prophase
- (4) Telophase

194. How many mitotic division occur in a cell of root tip to form 354 cells :

- (1) 354
- (2) 353
- (3) 177
- (4) 86

195. Stomochord present in:

- (1) Urochordata
- (2) Cephalochordata
- (3) Hemichordata
- (4) All of these

196. Comparison of different transport mechanism :

Property	Simple Diffusion	Facilitated Transport	Active Transport
Uphill Transport	A	B	C

What is on A, B and C :

- (1) No, No, yes
- (2) Yes, Yes, Yes
- (3) No, Yes, No
- (4) No, Yes, Yes

197. Moss protonema, PEN of dicot, Rhizoids of moss, prothallus of fern, gemma of marchantia, egg of liverwort, zygote of fern.

How many are haploid structure.

- (1) 5

198. The hypodermis in dicot stem are made up of :

- (1) Collenchyma
- (2) Sclerenchyma
- (3) Parenchyma
- (4) Cuticle

199. Which of the following are secondary meristems

- (1) Lateral meristems
- (2) Interfascicular cambium
- (3) Cork cambium
- (4) All of these

200. Sieve tube elements are present in the phloem of:

- (1) Gymnosperms
- (2) Pteridophytes
- (3) Angiosperms
- (4) Algae

SOLUTION

PHYSICS

SECTION-A

1. (3) [NCERT-49]

8 m

2. (1)

$$\frac{2u \sin \theta}{g}$$

= 8 sec.

3. (2) [NCERT-46]

$u \cos \theta$

4. (1) [NCERT-94]

$$v \propto \frac{1}{\text{intensity of noise}}$$

5. (2) [NCERT-117]

Never cancelled each other.

6. (1) [NCERT-98]

$v^2 = 2g \sin \theta \cdot S$ (i) [on smooth incline plane]

$\frac{v^2}{n^2} = 2(g \sin \theta - \mu g \cos \theta) S$ (ii) [on rough incline plane]

eqn. (i) and (ii)

$$n^2 = \frac{\sin \theta}{\sin \theta - \mu \cos \theta} \Rightarrow \mu = \tan \theta \left(1 - \frac{1}{n^2} \right)$$

7. (2) [NCERT-92]

Momentum is conserved in horizontal & vertical directions

$$\therefore 3 \times 20 = 2v_1 \Rightarrow v_1 = 30 \text{ m/s}$$

$$0 = 1 \times 80 - 2v_2 \Rightarrow v_2 = 40 \text{ m/s}$$

Hence net velocity of B, $V = \sqrt{30^2 + 40^2}$

= 50 m/s

SECTION-A

1. (3) [NCERT-49]

8 m

2. (1)

$$\frac{2u \sin \theta}{g}$$

= 8 sec.

3. (2) [NCERT-46]

$u \cos \theta$

4. (1) [NCERT-94]

$$v \propto \frac{1}{\text{intensity of noise}}$$

5. (2) [NCERT-117]

Never cancelled each other.

6. (1) [NCERT-98]

$v^2 = 2g \sin \theta \cdot S$ (i) [on smooth incline plane]

$\frac{v^2}{n^2} = 2(g \sin \theta - \mu g \cos \theta) S$ (ii) [on rough incline plane]

eqn. (i) and (ii)

$$n^2 = \frac{\sin \theta}{\sin \theta - \mu \cos \theta} \Rightarrow \mu = \tan \theta \left(1 - \frac{1}{n^2} \right)$$

7. (2) [NCERT-92]

Momentum is conserved in horizontal & vertical directions

$$\therefore 3 \times 20 = 2v_1 \Rightarrow v_1 = 30 \text{ m/s}$$

$$0 = 1 \times 80 - 2v_2 \Rightarrow v_2 = 40 \text{ m/s}$$

Hence net velocity of B, $V = \sqrt{30^2 + 40^2}$

= 50 m/s

8. (1) [NCERT-73]

$$l^2 = (500 - 20t)^2 + (400 - 15t)^2$$

For minimum distance

$$\frac{dl}{dt} = 0$$

$$= 20 \text{ m.}$$

9. (4) [NCERT-46]

10. (1) [NCERT-137]

zero.

11. (4) [NCERT-178]

As there is no external force so velocity of center of mass remains V .

12. (2) [NCERT-110]

$$v = u - at$$

$$0 = 10 - a \times 4$$

$$a = 2.5$$

$$F = ma$$

$$= 465 \times 2.5 \quad \text{so } F = 1.2 \times 10^3 \text{ N}$$

13. (2) [NCERT-347]

$$A_{\text{net}} = \sqrt{\left(\frac{A}{2}\right)^2 + A^2} = \frac{A\sqrt{5}}{2}$$

14. (2) [NCERT-104]

$$\vec{\omega} \times \vec{V} = \vec{A}$$

$$\vec{\alpha} \times \vec{r} = \vec{B}$$

Then \vec{A} and \vec{B} will be perpendicular

$$\vec{A} \cdot \vec{B} = 0$$

15. (4) [NCERT-104]

16. (3) [NCERT-163]

8. (1) [NCERT-73]

$$l^2 = (500 - 20t)^2 + (400 - 15t)^2$$

For minimum

$$\frac{dl}{dt} = 0$$

$$= 20 \text{ m.}$$

9. (4) [NCERT-46]

10. (1) [NCERT-137]

zero.

11. (4) [NCERT-178]

As there is no external force so velocity of center of mass remains V .

12. (2) [NCERT-110]

$$v = u - at$$

$$0 = 10 - a \times 4$$

$$a = 2.5$$

$$F = ma$$

$$= 465 \times 2.5 \quad \text{so } F = 1.2 \times 10^3 \text{ N}$$

13. (2) [NCERT-347]

$$A_{\text{net}} = \sqrt{\left(\frac{A}{2}\right)^2 + A^2} = \frac{A\sqrt{5}}{2}$$

14. (2) [NCERT-104]

$$\vec{\omega} \times \vec{V} = \vec{A}$$

$$\vec{\alpha} \times \vec{r} = \vec{B}$$

Then \vec{A} and \vec{B} will be perpendicular

$$\vec{A} \cdot \vec{B} = 0$$

15. (4) [NCERT-104]

16. (3) [NCERT-163]

17. (2)

[NCERT-158]

$$mg(2R) = \frac{1}{2} I\omega^2$$

$$2mgR = \frac{1}{2} \left(\frac{5}{4} mR^2 \right) \times \frac{v^2}{R^2}$$

$$2mgR = \frac{5}{8} mv^2$$

$$v^2 = \frac{16gR}{5}$$

$$\Rightarrow v = \sqrt{\frac{16gR}{5}}$$

18. (1)

[NCERT-190]

$$L = \frac{2 \times 2 \times 2}{\sqrt{1+(1)^2}}$$

$$= 4\sqrt{2} \text{ kg m}^2/\text{s}$$

19. (2)

[NCERT-203]

$$\Delta U = \frac{Mgh}{\left(1 + \frac{h}{R}\right)}$$

$$\text{So } \frac{1}{2} mv^2 = \frac{mg(2R)}{\left(1 + \frac{2R}{R}\right)}$$

$$\frac{1}{2} mv^2 = \frac{2mgR}{3}$$

$$v^2 = \frac{4gR}{3} \quad \Rightarrow v = 2\sqrt{\frac{gR}{3}}$$

20. (1)

[NCERT-343]

$$-\tan 45 = \frac{a}{x}$$

$$a = -x$$

$$a = -\omega^2 x$$

$$\omega = 1$$

$$\frac{2\pi}{T} = 1 \Rightarrow T = 2\pi \text{ seconds}$$

17. (2)

[NCERT-158]

$$mg(2R) = \frac{1}{2} I\omega^2$$

$$2mgR = \frac{1}{2} \left(\frac{5}{4} mR^2 \right) \times \frac{v^2}{R^2}$$

$$2mgR = \frac{5}{8} mv^2$$

$$v^2 = \frac{16gR}{5}$$

$$\Rightarrow v = \sqrt{\frac{16gR}{5}}$$

18. (1)

[NCERT-190]

$$L = \frac{2 \times 2 \times 2}{\sqrt{1+(1)^2}}$$

$$= 4\sqrt{2} \text{ kg m}^2/\text{s}$$

19. (2)

[NCERT-203]

$$\Delta U = \frac{Mgh}{\left(1 + \frac{h}{R}\right)}$$

$$\text{So } \frac{1}{2} mv^2 = \frac{mg(2R)}{\left(1 + \frac{2R}{R}\right)}$$

$$\frac{1}{2} mv^2 = \frac{2mgR}{3}$$

$$v^2 = \frac{4gR}{3} \quad \Rightarrow v = 2\sqrt{\frac{gR}{3}}$$

20. (1)

[NCERT-343]

$$-\tan 45 = \frac{a}{x}$$

$$a = -x$$

$$a = -\omega^2 x$$

$$\omega = 1$$

$$\frac{2\pi}{T} = 1 \Rightarrow T = 2\pi \text{ seconds}$$

21. (2) [NCERT-145]

$$m_1x_1 - m_2x_2 = 0$$

$$50x_1 - 150(2 - x_1) = 0$$

$$200x_1 = 300x_2$$

$$x_1 = 1.5 \text{ m.}$$

22. (2) [NCERT-147]

$$\frac{1}{2}mv^2 \left(1 + \frac{k^2}{R^2}\right) = mg \frac{5v^2}{6g}$$

23. (3) [NCERT-148]

$$a = v \frac{dv}{dx}$$

$$\frac{dv}{dx} = b \frac{d}{dx} (x)^{1/2}$$

$$\frac{dv}{dx} = b \left(\frac{1}{2} x^{-1/2}\right)$$

$$\frac{dv}{dx} = \frac{b}{2\sqrt{x}}$$

$$\text{so } a = b\sqrt{x} \times \frac{b}{2\sqrt{x}} \Rightarrow a = \frac{b^2}{2}$$

$$F = m a$$

$$F = \frac{2b^2}{2} \Rightarrow F = b^2$$

$$dW = Fdx \Rightarrow W = \int Fdx$$

$$= \int_0^4 b^2 dx$$

[W = 4 b²].

24. (1) [NCERT-129]

$$e^n = \sqrt{\frac{h_n}{h_0}}$$

Where n = number of collision

here n = 1 and $e = \frac{1}{\sqrt{2}}$

$$\text{So } \frac{1}{\sqrt{2}} = \sqrt{\frac{h}{h_0}}$$

$$h = \frac{h_0}{2} \Rightarrow h = \frac{10}{2}$$

h = 5 metre.

21. (2) [NCERT-145]

$$m_1x_1 - m_2x_2 = 0$$

$$x_1 + x_2 = 2 \text{ -----(1)}$$

$$50x_1 - 150(2 - x_1) = 0$$

$$200x_1 = 300x_2$$

$$x_1 = 1.5 \text{ m.}$$

22. (2) [NCERT-147]

$$\frac{1}{2}mv^2 \left(1 + \frac{k^2}{R^2}\right) = mg \frac{5v^2}{6g}$$

23. (3) [NCERT-148]

$$a = v \frac{dv}{dx}$$

$$\frac{dv}{dx} = b \frac{d}{dx} (x)^{1/2}$$

$$\frac{dv}{dx} = b \left(\frac{1}{2} x^{-1/2}\right)$$

$$\frac{dv}{dx} = \frac{b}{2\sqrt{x}}$$

$$\text{so } a = b\sqrt{x} \times \frac{b}{2\sqrt{x}} \Rightarrow a = \frac{b^2}{2}$$

$$F = m a$$

$$F = \frac{2b^2}{2} \Rightarrow F = b^2$$

$$dW = Fdx \Rightarrow W = \int Fdx$$

$$= \int_0^4 b^2 dx$$

[W = 4 b²].

24. (1) [NCERT-129]

$$e^n = \sqrt{\frac{h_n}{h_0}}$$

~~gk = I ? k h l e ; k~~

n = 1 ~~r k e~~ $e = \frac{1}{\sqrt{2}}$

$$\text{vr } \frac{1}{\sqrt{2}} = \sqrt{\frac{h}{h_0}}$$

$$h = \frac{h_0}{2} \Rightarrow h = \frac{10}{2}$$

h = 5 ~~ev~~.

25. (3) [NCERT-128]
 26. (2) [NCERT-276]

As we know $\alpha = \frac{\Delta L}{L_0 \Delta \theta}$

$$\Delta \theta = \frac{\Delta L}{\alpha L_0} = \frac{5 \times 10^{-5}}{10 \times 10^{-6} \times 1} = 5^\circ\text{C}$$

27. (2) [NCERT-274]

Since $102.2^\circ\text{F} \rightarrow 39^\circ\text{C}$ and $98.6^\circ\text{F} \rightarrow 37^\circ\text{C}$
 Hence $\Delta Q = m \cdot s \cdot \Delta \theta = 80 \times 1000 \times (39 - 37)$
 $= 16 \times 10^4 \text{ cal} = 160 \text{ kcal.}$

28. (3) [NCERT-281]

$$mg(h_1 - h_2) = m \cdot c \cdot \Delta \theta$$

$$\Rightarrow \Delta \theta = \frac{g(h_1 - h_2)}{c}$$

$$= \frac{10(10 - 5.4)}{460} = 0.1^\circ\text{C}$$

29. (2) [NCERT-327]

$$VP^3 = \text{constant} = k \Rightarrow P = \frac{k}{V^{1/3}}$$

$$PV = \mu RT \Rightarrow \frac{k}{V^{1/3}} \cdot V = \mu RT$$

$$\Rightarrow V^{2/3} = \frac{\mu RT}{k}$$

$$\left(\frac{V_1}{V_2}\right)^{2/3} = \frac{T_1}{T_2} \Rightarrow \left(\frac{V}{27V}\right)^{2/3} = \frac{T}{T_2}$$

$$T_2 = 9T.$$

30. (3) [NCERT-326]

$$v_{\text{rms}} \propto \frac{1}{\sqrt{M}} \Rightarrow \frac{v_1}{v_2} = \sqrt{\frac{M_2}{M_1}}$$

$$\therefore \frac{1}{\sqrt{2}} = \sqrt{\frac{M_2}{32}} \Rightarrow M_2 = 16.$$

Hence the gas is CH_4 .

25. (3) [NCERT-128]
 26. (2) [NCERT-276]

As we know $\alpha = \frac{\Delta L}{L_0 \Delta \theta}$

$$\Delta \theta = \frac{\Delta L}{\alpha L_0} = \frac{5 \times 10^{-5}}{10 \times 10^{-6} \times 1} = 5^\circ\text{C}$$

27. (2) [NCERT-274]

Since $102.2^\circ\text{F} \rightarrow 39^\circ\text{C}$ and $98.6^\circ\text{F} \rightarrow 37^\circ\text{C}$
 Hence $\Delta Q = m \cdot s \cdot \Delta \theta = 80 \times 1000 \times (39 - 37)$
 $= 16 \times 10^4 \text{ cal} = 160 \text{ kcal.}$

28. (3) [NCERT-281]

$$mg(h_1 - h_2) = m \cdot c \cdot \Delta \theta$$

$$\Rightarrow \Delta \theta = \frac{g(h_1 - h_2)}{c}$$

$$= \frac{10(10 - 5.4)}{460} = 0.1^\circ\text{C}$$

29. (2) [NCERT-327]

$$VP^3 = \text{constant} = k \Rightarrow P = \frac{k}{V^{1/3}}$$

$$PV = \mu RT \Rightarrow \frac{k}{V^{1/3}} \cdot V = \mu RT$$

$$\Rightarrow V^{2/3} = \frac{\mu RT}{k}$$

$$\left(\frac{V_1}{V_2}\right)^{2/3} = \frac{T_1}{T_2} \Rightarrow \left(\frac{V}{27V}\right)^{2/3} = \frac{T}{T_2}$$

$$T_2 = 9T.$$

30. (3) [NCERT-326]

$$v_{\text{rms}} \propto \frac{1}{\sqrt{M}} \Rightarrow \frac{v_1}{v_2} = \sqrt{\frac{M_2}{M_1}}$$

$$\therefore \frac{1}{\sqrt{2}} = \sqrt{\frac{M_2}{32}} \Rightarrow M_2 = 16.$$

CH_4

31. (3)

[NCERT-328]

$$(C_V)_{\text{mix}} = \frac{\mu_1 C_{V_1} + \mu_2 C_{V_2}}{\mu_1 + \mu_2}$$

$$= \frac{1 \times \frac{3}{2}R + 1 \times \frac{5}{2}R}{1+1} = 2R$$

$$\left((C_V)_{\text{mono}} = \frac{3}{2}R, (C_V)_{\text{di}} = \frac{5}{2}R \right)$$

32. (2)

[NCERT-324]

Change in internal energy from A \rightarrow B is

$$\Delta U = \frac{f}{2} \mu R \Delta T = \frac{f}{2} (P_f V_f - P_i V_i)$$

$$= \frac{3}{2} (2P_0 \times 2V_0 - P_0 \times V_0) = \frac{9}{2} P_0 V_0$$

$$W_{A \rightarrow B} = \frac{1}{2} (P_0 + 2P_0) \times (2V_0 - V_0) = \frac{3}{2} P_0 V_0$$

$$\Delta Q = \Delta U + \Delta W$$

$$= \frac{9}{2} P_0 V_0 + \frac{3}{2} P_0 V_0 = 6P_0 V_0$$

33. (2)

[NCERT-329]

38. (4)

[NCERT-287]

$$y \propto \text{slope}.$$

39. (3)

[NCERT-365]

$$3l_1 = 3 \times 16 = 48\text{cm}$$

40. (2)

[NCERT-347]

$$y = -0.8A \sin(\omega t + kx)$$

41. (3)

[NCERT-373]

Third overtone is the fourth harmonic i.e.,

$$n_4 = 4n_1 = 4 \times 100 = 400 \text{ Hz}$$

42. (2)

[NCERT-373]

$$l_1 + l_2 + l_3 = 110\text{cm} \text{ and } n_1 l_1 = n_2 l_2 = n_3 l_3$$

$$n_1 : n_2 : n_3 :: 1 : 2 : 3$$

$$\therefore \frac{n_1}{n_2} = \frac{1}{2} = \frac{l_2}{l_1} \Rightarrow l_2 = \frac{l_1}{2}$$

$$\text{and } \frac{n_1}{n_3} = \frac{1}{3} = \frac{l_3}{l_1} \Rightarrow l_3 = \frac{l_1}{3}$$

$$\therefore l_1 + \frac{l_1}{2} + \frac{l_1}{3} = 110$$

$$\text{So, } l_1 = 60\text{cm}, l_2 = 30\text{cm}, l_3 = 20\text{cm}$$

43. (3) [NCERT-344]

$$n_1 l_1 = n_2 l_2 = n_3 l_3 \dots = \text{constant} = k \text{ (say)} = nl$$

$$l_1 + l_2 + l_3 + l_4 + \dots = 1$$

$$\frac{k}{n_1} + \frac{k}{n_2} + \frac{k}{n_3} + \frac{k}{n_4} + \dots = \frac{k}{n}$$

$$\Rightarrow \frac{1}{n} = \frac{1}{n_1} + \frac{1}{n_2} + \frac{1}{n_3} + \dots$$

44. (3) [NCERT-372]

Given $y = 5 \sin \frac{\pi x}{3} \cos 40 \pi t$

Comparing with $y = 2a \cos 2\pi ft \sin \frac{2\pi x}{\lambda}$

$$\frac{2\pi}{\lambda} = \frac{\pi}{3} \Rightarrow \lambda = 6 \text{ cm.}$$

$$= \frac{\lambda}{2} = 3 \text{ cm.}$$

45. (2) [NCERT-378]

From the given equation $\omega_1 = 2\pi n_1 = 646\pi$
 $\Rightarrow n_1 = 323$ and $\omega_2 = 2\pi n_2 = 652\pi \Rightarrow n_2 = 326$
 Hence, beat frequency = $326 - 323 = 3$

46. (3) Because there is no accelerating or retarding force available in horizontal motion

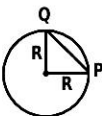

47. (1) Density if only single liquid filled.

48. (2) non-uniform motion.

49. (2) According to Bernoulli's theorem $P_C > P_B > P_A$

50. (3) [NCERT-79]

$$|\vec{v}_{av}| = \left| \frac{\text{displacement}}{\text{time}} \right|$$

$$= \frac{PQ}{t} = \frac{\sqrt{2}R}{t}$$

$$\theta = \frac{1}{2} \alpha t^2 \text{ or } t = \sqrt{\frac{2\theta}{\alpha}}, \text{ where } \theta = \frac{\pi}{2}$$

$$= \sqrt{\frac{2 \times \frac{\pi}{2}}{\pi/4}} = 2s$$

$$\therefore |\vec{v}_{av}| = \frac{\sqrt{2}R}{t} = \frac{\sqrt{2} \cdot \sqrt{2}}{2} = 1 \text{ m/s}$$

43. (3) [NCERT-344]

$$n_1 l_1 = n_2 l_2 = n_3 l_3 \dots = \text{constant} = k \text{ (say)} = nl$$

$$l_1 + l_2 + l_3 + l_4 + \dots = 1$$

$$\frac{k}{n_1} + \frac{k}{n_2} + \frac{k}{n_3} + \frac{k}{n_4} + \dots = \frac{k}{n}$$

$$\Rightarrow \frac{1}{n} = \frac{1}{n_1} + \frac{1}{n_2} + \frac{1}{n_3} + \dots$$

44. (3) [NCERT-372]

Given $y = 5 \sin \frac{\pi x}{3} \cos 40 \pi t$

Comparing with $y = 2a \cos 2\pi ft \sin \frac{2\pi x}{\lambda}$

$$\frac{2\pi}{\lambda} = \frac{\pi}{3} \Rightarrow \lambda = 6 \text{ cm.}$$

$$= \frac{\lambda}{2} = 3 \text{ cm.}$$

45. (2) [NCERT-378]

From the given equation $\omega_1 = 2\pi n_1 = 646\pi$
 $\Rightarrow n_1 = 323$ and $\omega_2 = 2\pi n_2 = 652\pi \Rightarrow n_2 = 326$
 Hence, beat frequency = $326 - 323 = 3$

46. (3) Because there is no accelerating or retarding force available in horizontal motion

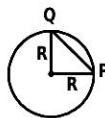

47. (1) Density if only single liquid filled.

48. (2) non-uniform motion.

49. (2) According to Bernoulli's theorem $P_C > P_B > P_A$

50. (3) [NCERT-79]

$$|\vec{v}_{av}| = \left| \frac{\text{displacement}}{\text{time}} \right|$$

$$= \frac{PQ}{t} = \frac{\sqrt{2}R}{t}$$

$$\theta = \frac{1}{2} \alpha t^2 \text{ or } t = \sqrt{\frac{2\theta}{\alpha}}, \text{ where } \theta = \frac{\pi}{2}$$

$$= \sqrt{\frac{2 \times \frac{\pi}{2}}{\pi/4}} = 2s$$

$$\therefore |\vec{v}_{av}| = \frac{\sqrt{2}R}{t} = \frac{\sqrt{2} \cdot \sqrt{2}}{2} = 1 \text{ m/s}$$

 bounded structure

110. (4) [NCERT-I-144]
 Classification of amino acids are done on the basis of Nature of R group
 → R group is variable in different amino acids

111. (1) [NCERT-I-323, 324, 325, 326]
 Reissners - Cochlea
 membrane
 Blind spot - Photoreceptor cells
 absent
 Tympanic - External ear
 membrane
 Sclera - Cornea

112.(1) [NC-I-125]
 Anton Von Leeuwenhoek first saw and described a live cell. Robert Brown later discovered the nucleus.

113.(4) [NC-I-133-134]
 Golgi apparatus consist of many flat, disc-shaped sacs or cisternae of 0.5 μm to 1.0 μm diameter.
 The golgi cisternae are concentrically arranged near the Nucleus.

114. (1) [NCERT-I-183]
 Imbibition is also diffusion of water along the concentration gradient.

115. (3) [NCERT-I-196]
 Macronutrients are generally present in plant tissues in large amounts (in excess of 10 mmole Kg⁻¹ of dry matter). The macronutrients include carbon, hydrogen, oxygen, nitrogen, phosphorous, sulphur, potassium, calcium and magnesium. Of these, carbon, hydrogen and oxygen are mainly obtained from CO₂ and H₂O, while the others are absorbed from the soil as mineral nutrition.
 Micronutrients or trace elements, are needed in very small amounts (less than 10 mmole Kg⁻¹ of dry matter). These include iron, manganese, copper, molybdenum, zinc, boron, chlorine and nickel.

<p>120. (1) [NCERT-I-262]</p> <p>The stomach stores the food for 4-5 hours. The food mixes thoroughly with the acidic gastric juice of the stomach by the churning movements of its muscular wall and is called the chyme. The proenzyme pepsinogen, on exposure to hydrochloric acid gets converted into the active enzyme pepsin, the proteolytic enzyme of the stomach. Pepsin converts proteins into proteoses and peptones (peptides). The mucus and bicarbonates present in the gastric juice play an important role in lubrication and protection of the mucosal epithelium from excoriation by the highly concentrated hydrochloric acid. HCl provides the acidic pH (pH 1.8) optimal for pepsins. Rennin is a proteolytic enzyme found in gastric juice of infants which helps in the digestion of milk proteins. Small amounts of lipases are also secreted by gastric glands.</p>	<p>120. (1) [NCERT-I-262]</p> <p>NAD⁺ → NADH + H⁺ = r h u l R k u</p> <p>FAD⁺ → FADH₂ = , d l R k u</p> <p>119. [NCERT-I-214-215]

Hence, within the chloroplast, protons in the stroma decrease in number, while in the lumen there is accumulation of protons. This creates a proton gradient across the thylakoid membrane as well as a measurable decrease in pH in the lumen.

The ATPase enzyme consists of two parts: one called the F_0 is embedded in the membrane and forms a transmembrane channel that carries out facilitated diffusion of protons across the membrane. The other portion is called F_1 and protrudes on the outer surface of the thylakoid membrane on the side that faces the stroma. The break down of the gradient provides enough energy to cause a conformational change in the F_1 particle of the ATPase, which makes the enzyme synthesise several molecules of energy-packed ATP.

140. (1)

[NCERT-I-230]

In both lactic acid and alcohol fermentation not much energy is released; less than seven per cent of the energy in glucose is released and not all of it is trapped as high energy bonds of ATP.

 Volvox, porphyra - Algae
 Female thallus of marchantia - Bryophytes
 Ginkgo - Gymnosperm
 Cryptogams - Algae, Bryophyte, Pteridophyte
 Porphyra are members of rhodophyceae they are produced non flagellates male gamete
 → All plants contains chlorophyll a
 → Marchantia - Haplodiplontic life cycle
 → Volvox, porphyra - Haplontic life cycle
 → Ginkgo - Diplontic life cycle

160. (3) [NCERT-I-38]

One of the gymnosperms, the giant redwood tree Sequoia is one of the tallest tree species. The roots are generally tap roots. Roots in some genera have fungal association in the form of mycorrhiza (Pinus), while in some others (Cycas) small specialised roots called coralloid roots are associated with N₂-fixing cyanobacteria. Mycorrhiza are symbiotic association.

In Mycorrhiza fungi are associates with root of pinus and in cycas cyanobacteria are associates these association are symbiotic. Fungi are heterotrophic and cyanobacteria are autotrophic organism.

161.(2) [Modified NEET]

Cryptogams - Hidden sex organ bearing plant.
 Phanerogams - visible sex organs bearing plant.
 Algae, Bryophyta, Pteridophyta - cryptogams
 Gymnosperm, Angiosperms - Phanerogams

163. (1) [NCERT-I-104]

- (a) d e ~ d . l z f u (iii) n i h l f k
- (b) j D r f u e l z k (iv) v l f k e t t k
- (c) f j f l j l d k (ii) , f N d
- (d) â n t (i) v u B N d

164. (3) [NCERT-I-144, 145]
 Option 3 is the correct answer of the question as correct matching are
 Fatty acid - Palmitic acid
 Phospholipid - Lecithin
 Aromatic amino acid - Tryptophan
 Acidic amino acid - Glutamic acid

165. (4) [NCERT-I-159]
 Protein portion of the enzymes is called the apoenzyme. non-protein constituents called cofactors Three kinds of cofactors may be identified: prosthetic groups, co-enzymes and metal ions.

166. (4) [NCERT-I-262]
 Both (A) and (R) are true and (R) is the correct explanation of (A)

167. (3) [NCERT-I-68-71]
 a, b - tap root modification
 → h - Phylloclade of opuntia
 Aerial modification of stem.
 It is phylloclade for photosynthesis.

168. (4) [NCERT-II-23, 26,27]
 → Vegetative cell, generative cell present in pollen grain
 → All nuclei in embryosac are haploid

169. (3) [NCERT-I-265,266]
 Vomit centre - Medulla

170. (4) [NCERT-I-310,311]
 Coxal bone - Pelvic girdle
 Pelvic girdle are included in the appendicular skeleton
 Total fore limbs bone - 60
 Total hind limbs bone - 60

164. (3) [NCERT-I-144, 145]
 (a) d h v Ey (iv) i k e m d v Ey

171. (4) [NC-I-127]
 The prokaryotic cells are represented by bacteria, blue-green algae, mycoplasma and PPLO (Pleuro Pneumonia Like Organisms). Yeast is a unicellular fungus.

172. (3) [NC-I-134]
 The isolated lysosomal vesicles have been found to be very rich in almost all types of hydrolytic enzymes (hydrolases - lipases, proteases, carbohydrases) optimally active at the acidic pH.

173. (3) [NC-I-134]
 Tonoplast is differentially permeable membrane surrounding the Vacuole.

174. (3) [NC-I-169]
 The simultaneous splitting of the centromere of each chromosome occur in Anaphase II.

175. (2) [NCERT-I-285]
 SA node is called as pace maker
 Atrial systole causes 30% ventricular filling
 Cardiac output depends on ventricular filling
 Blood pumped during a cardiac cycle is stroke volume.

176. (4) [NCERT-I-211]
 The reaction centre is different in both the photosystems. In PS I the reaction centre chlorophyll a has an absorption peak at 700 nm, hence is called P 700, while in PS II it has absorption maxima at 680 nm, and is called P 680.

177. (3) [NC-I-110]
 Ciliated epithelium found in fallopian tube
 Three types of cell junctions are found in the epithelium and other tissues
 Neural tissue exerts the greatest control over the body's responsiveness to changing conditions
 The simple squamous epithelium is made of a single thin layer of flattened cells

178. (4) [NC-I-108]
 True regarding blood vascular system of Pheretima
 (1) Contraction keep blood circulation in one direction only
 (2) Smaller blood vessels supply blood to gut, nerve cord and body wall
 (3) Haemoglobin is dissolved in blood plasma and blood cells are phagocytic in nature

179. (4) [NC-I-120]
 c and d true
 consist of a pair of ovary, situated near kidneys.
 ovaries are not functionally related to kidneys
 a pair of oviduct opens into cloaca separately.
 female lays 2500-3000 eggs at a time

- 180.(1)** [NCERT-I-58-59]
- a. Snake (Naja) - Reptiles
 - b. Vulture - Birds
 - c. Platypus - Mammals
 - d. Hippocampus - Osteichythes
- All are vertebrate
 - All are chordate

181. (2) [NCERT-I-70]
 In leaves a bud is present in the axil of petiole in Simple leaf and Compound leaf.

182. (1) [NCERT-I-139]
 In case of Acrocentric type of chromosome the centromere is situated close to its end forming one extremely short and one very long arm.

183. (3) [NCERT-I-58]
 Viper exceptionally viviparous reptiles.

184. (2) [NCERT-I-273]
 The solubility of CO₂ in blood higher than that of 20-25 times

185. (3) [NCERT-I-293]
 Vasa recta is a minute vessel of capillaries

SECTION-B - [ZOOLOGY]

186. (1) [NCERT-I-149, Mod. NEET 2019]
 Heterocyclic compounds in nucleic acids are the nitrogenous bases named adenine, guanine, uracil, cytosine, and thymine. Adenine and Guanine are substituted purines while the rest are substituted pyrimidines. The skeletal heterocyclic ring is called as purine and pyrimidine respectively. The sugar found in polynucleotides is either ribose (a monosaccharide pentose) or 2' deoxyribose. A nucleic acid containing deoxyribose is called deoxyribonucleic acid (DNA) while that which contains ribose is called ribonucleic acid (RNA).

179. (4) [NC-I-120]
 c and d true
 consist of a pair of ovary, situated near kidneys.
 ovaries are not functionally related to kidneys
 a pair of oviduct opens into cloaca separately.
 female lays 2500-3000 eggs at a time

- 180. (1)** [NCERT-I-58-59]

 - All are chordate

181. (2) [NCERT-I-70]
 In leaves a bud is present in the axil of petiole in Simple leaf and Compound leaf.

182. (1) [NCERT-I-139]
 In case of Acrocentric type of chromosome the centromere is situated close to its end forming one extremely short and one very long arm.

183. (3) [NCERT-I-58]
 Viper exceptionally viviparous reptiles.

184. (2) [NCERT-I-273]
 The solubility of CO₂ in blood higher than that of 20-25 times

185. (3) [NCERT-I-293]
 Vasa recta is a minute vessel of capillaries

SECTION-B - [ZOOLOGY]

186. (1) [NCERT-I-149, Mod. NEET 2019]
 Heterocyclic compounds in nucleic acids are the nitrogenous bases named adenine, guanine, uracil, cytosine, and thymine. Adenine and Guanine are substituted purines while the rest are substituted pyrimidines. The skeletal heterocyclic ring is called as purine and pyrimidine respectively. The sugar found in polynucleotides is either ribose (a monosaccharide pentose) or 2' deoxyribose. A nucleic acid containing deoxyribose is called deoxyribonucleic acid (DNA) while that which contains ribose is called ribonucleic acid (RNA).

187. (3) [NC-I-144]
Phospholipid are found in cell membrane. Lecithin is one example. Some tissues especially the neural tissues have lipids with more complex structures.

188. (4) [NC-I-147]

TABLE 9.3 Some Secondary Metabolites

Pigments	Carotenoids, Anthocyanins, etc.
Alkaloids	Morphine, Codeine, etc.
Terpenoids	Monoterpenes, Diterpenes etc.
Essential oils	Lemon grass oil, etc.
Toxins	Abrin, Ricin
Lectins	Concanavalin A
Drugs	Vinblastin, curcumin, etc.
Polymeric substances	Rubber, gums, cellulose

When one analyses plant, fungal and microbial cells, one would see thousands of compounds other than these called primary metabolites, e.g. alkaloids, flavonoids, rubber, essential oils, antibiotics, coloured pigments, scents, gums, spices. These are called secondary metabolites (Table 9.3). While primary metabolites have identifiable functions and play known roles in normal physiological processes, we do not at the moment, understand the role or functions of all the 'secondary metabolites' in host organisms.

189. (2) [NC-I-150]
An α - helix is an example of secondary structure of protein.

190. (3) [NC-I-159]

NAD = Nicotinamide adenine dinucleotide

191. (1) [NCERT-I-169, Mod. AIPMT 2012]

Anaphase I: The homologous chromosomes separate, while sister chromatids remain associated at their centromeres.

192. (4) [NCERT-I-166]

Events of Telophase

Chromosomes cluster at opposite spindle poles and their identity is lost as discrete elements.

Nuclear envelope assembles around the chromosome clusters.

Nucleolus, golgi complex and ER reform.

193. (1) [NCERT-I-164]

The duration of time period in m-Phase of cell cycle prophase > Telophase > Metaphase > Anaphase.

194. (2) [NC-I-163]

Number of mitotic division equal to given number of cells - 1 = 354 - 1 = 353

187. (3) [NC-I-144]

यह फ्लिपिड हैं जो तंत्रिका तissue में पाए जाते हैं।

188. (4) [NC-I-147]

तालिका 9.3 कुछ द्वितीयक उत्पाद

वर्णक	कैरोटोनाइड्स, एंथोसाइनिन्स, आदि
एल्कलॉयड्स	मॉर्फिन, कोडेन, आदि
टर्पेनॉयड्स	मोनोटेरपीन्स, डाइटेरपीन्स आदि
आवश्यक तेल	नींबूघास तेल, आदि
टॉक्सिन	एब्रिन, रिसेन
लेक्टिन	कॉनकावैलीन ए
ड्रग्स	वीनब्लास्टिन, करकुमिन आदि
बहुलक पदार्थ	रबर, गोंद, सेलुलोज

जब हम पौधा, फंगल और सूक्ष्मजीवों को विश्लेषण करते हैं, तो हमें हजारों यौगुकों को देखने में आता है जो प्राथमिक मेटाबॉलाइट्स के अलावा हैं, जैसे कि अल्कलॉयड्स, फ्लेवोनॉयड्स, रबर, आवश्यक तेल, एंटीबायोटिक्स, रंगीन वर्णक, गंध, रस, मसाले।

189. (2) [NC-I-150]

एक α - हेलिक्स प्रोटीन की द्वितीयक संरचना का एक उदाहरण है।

190. (3) [NC-I-159]

NAD = Nicotinamide adenine dinucleotide

191. (1) [NCERT-I-169, Mod. AIPMT 2012]

अनाफेस I: समजात गुणसूत्रों का विभाजन होता है, जबकि बहन गुणसूत्रों का केंद्रक के निकट रहना जारी रखते हैं।

192. (4) [NCERT-I-166]

टेलोफेस के घटनाएँ

→ गुणसूत्रों को विपरीत ध्रुवों पर एकत्रित करने के लिए ध्रुवों की ओर खिंचा जाता है।

→ केंद्रक का पुनर्गठन होता है।

→ गुणसूत्रों की पहचान खो जाती है क्योंकि वे अलग-अलग तत्वों के रूप में व्यवहार करते हैं।

193. (1) [NCERT-I-164]

म-चक्र में समय की अवधि प्रोफेस > टेलोफेस > मेटाफेस > अनाफेस।

अनाफेस > टेलोफेस > मेटाफेस > प्रोफेस

194. (2) [NC-I-163]

दिए गए कोशिकाओं की संख्या = 354

= 354 - 1 = 353

195. (3) [NCERT-I-54]

Stomochord present in hemichordata

196. (1) [NCERT-I-178]

Property	Simple Diffusion	Facilitated Transport	Active Transport
Requires special membrane proteins	No	Yes	Yes
Highly selective	No	Yes	Yes
Transport saturates	No	Yes	Yes
Uphill transport	No	No	Yes
Requires ATP energy	No	No	Yes

197. (1) [NC-I-43]

Zygote of fern (2n),

Moss protonema (n),

Rhizoids of moss (n)

prothallus of fern (n)

Gemma of marchantia (n)

Egg of liverwort (n)

PEN of dicot (3n)

198. (1) [NCERT-I-92]

The cortical layers in dicot stem are made up of parenchyma.

199. (4) [NCERT-I-85]

The meristem which occurs between mature tissues is known as intercalary meristem. Both apical meristems and intercalary meristems are primary meristems because they appear early in life of a plant and contribute to the formation of the primary plant body.

200. (3) [NCERT-I-87, 88]

Phloem in angiosperms is composed sieve tube elements, companion cells, phloem parenchyma and phloem fibres. Gymnosperms have albuminous cells and sieve cells. They lack sieve tubes and companion cells.

195. (3) [NCERT-I-54]

Stomochord present in hemichordata

196. (1) [NCERT-I-178]

तालिका 11.1 विभिन्न परिवहन तंत्रों की तुलना

गुण	साधारण विसरण	सुमाध्य परिवहन	सक्रिय परिवहन
विशिष्ट झिल्लिका प्रोटीन की आवश्यकता	नहीं	हाँ	हाँ
उच्च वर्गीयक	नहीं	हाँ	हाँ
परिवहन संतृप्त	नहीं	हाँ	हाँ
शिखरीपर (अपहिल) परिवहन	नहीं	नहीं	हाँ
एटीपी ऊर्जा की आवश्यकता	नहीं	नहीं	हाँ

197. (1) [NC-I-43]
